RISK REMINDER

CHEMICAL SAFETY GUIDELINES

FYS

FOR YOUR SAFETY

1. Before you work with chemicals, read container labels and Safety Data Sheets.
2. Wear Personal Protective Equipment that fits.
3. Never sniff a chemical to find out what or where it is.
4. Add acids to water, not the other way around.
5. Mix corrosives or solvents slowly.
6. Know the location of eyewash stations and safety showers.
7. After you work with chemicals, don't eat or smoke until you wash your hands well.

A Safety Data Sheet-
the SDS- is designed to tell you
everything you need to know to use
a chemical safely.
