

# RISK REMINDER

## Power Washer Safety

1. Take 5 minutes before the job to think through the task, identify the hazards and how to decrease the risks.
2. Read the User Manual front to back before operating the pressure washer.
3. Never use a gas/diesel pressure washer in an enclosed space.
4. While cleaning be aware of your surroundings.

5. Start washing with the widest angle spray tip 2-feet from a test surface and adjust nozzle and distance as needed.

6. Avoid ladders and working at height.

7. Wear appropriate personal protective equipment.
