# RISK REMINDER

## Compressed Gas Tank Safety

OSHA requirements include:

**Storage:** Store in a ventilated area, 15' from heat sources, and secure with chains.

**Handling:** Handle carefully using proper equipment; avoid dropping or striking tanks.

**Labeling:** Clearly label with gas name, hazards, and safety precautions.

**Transport:** Transport upright and secure, following OSHA regulations.

**Inspection:** Regularly check for damage or leaks; remove damaged tanks immediately.

**Training:** Ensure employees are trained on hazards, handling, storage and emergency procedures.

**Emergency procedures:** Have written procedures and train employees on emergency response.
